

Web Programming

152-150

JavaScript Arrays

10 points

Make a copy of your Functions assignment. Remove the Even/Odd components.
(If you wish, you may start from scratch)

Modify the spooks counting and displaying components to incorporate arrays. You must:

- Store the names of the characters in an array
- Store the counts in an array
- Store the image file names in an array

If you wish, you can modify your program to be a little timelier. I've placed images of Santa's reindeer on OneDrive. Or, you may continue to count spooks. Don't forget to include an *other* option for spook or reindeer names that are not on your list (in your array). I used bumble.png for my *other* option.

Your web page should still display a *bar graph* as part of its results.

Bonus points will be awarded for implementing:

- Multi-dimensional arrays
- Associative arrays

Rudolph Rudolph Rudolph (50.0%)
Blitzen: 0 (0.0%)

Donner (16.7%)
Dasher: 0 (0.0%)

Cupid: 0 (0.0%)

Comet (16.7%)
Prancer: 0 (0.0%)

Dancer: 0 (0.0%)

Vixen: 0 (0.0%)
