HTML Tables

20 points

Add a web page to your help system to document changes to the project. Duplicate the table below. Feel free to add your own change data (at least 4 rows) and/or image if you wish, but do not change the structure of the table.

Remember to add links to and from the new page to/from the other pages of the site.

All objects are part of the table—dashed borders in the sample table below should be invisible on your web table.

Change Log			
	Date	Form/Class	Description
	2010-01-28	clsTrip	Added validation to appropriate fields; updated business constants to include validation limits.
	2010-01-27	frmGasMileage	Added combo box for vehicle type; updated tab order
	2010-01-26	frmGasMileage	Changed Brent's lame form image to a cooler one
	2010-01-25	clsTrip	Created and tested
	2010-01-25	frmWelcome	Changed Brent's name to my own

Table requirements:

- Center the table in the window
- Table width should be 90% of the window.
- Duplicate shading
- Note all text and the image are aligned to the top of their cells
- Image, Date and Form/Class columns should have a fixed size. The Description column should stretch with the window and the table the column is in.
- Document your table (add appropriate comments)
- Ensure the table(s) look similar in IE and Firefox
